

Locally agile.

TALENT

Our consultants are dedicated, local Agile experts who work side-by-side with your product teams to deliver product faster.

- Full agile teams
- Scrum Masters
- Coaches
- Product Owners
- Engineers
- Testers
- Analysts

Agile product development requires different roles and teams than traditional project delivery.

TRAINING

Whether you're getting started, optimizing, or scaling Agile, our training helps individuals and teams become more efficient and, ultimately, deliver more product. Our Agile training is led by certified trainers and can be readily customized to your needs.

ADVICE

In our experience, true Agile change doesn't come from the top—it happens almost organically. Our Agile solutions team only does one thing: help clients become more agile. We leverage their experience and provide advice to our clients in many areas.

- Maturity assessments
- Risk assessments
- Controls frameworks
- ROI management
- Coaching and training
- Change management

AGILE TRANSFORMATION HAPPENS LOCALLY.

The pressure is on to be faster, smarter, and more responsive than the competition, but Agile transformations are complex. Properly designing, adopting, and executing the conversion requires significant investment in planning, training, and fundamental readiness. Our Agile Transformation team helps you deliver solutions to respond quickly to market changes and deliver value. You'll be primed to create change, rather than react to it.

ENTERPRISE FRAMEWORKS LeSS, DaD, SAFe, RAGE, FAST, Spotify. Agile frameworks abound, and we can make sense of it all. We'll help you choose and implement the right solution, or blend of solutions, for your organization.

GOVERNANCE Increased Agile engagement requires a parallel increase in management, and we balance adoption with governance to support long-term transformation.

SCALING AGILE Many of our clients have already started down the Agile path, and need assistance scaling from a small group of product teams to the larger organization.

DIGITAL TRANSFORMATION Agile transformation is often part of an overall digital makeover that may include DevOps and a migration to the cloud. No problem – we can help with everything.

CHANGE MANAGEMENT A successful Agile practice requires significant change management. Some new concepts can run counter to long-standing practices, and clearly managing the change is important to drive engagement and value, and enable Agile to **take hold organically**.
